To whom it may concern,

I am writing in response to your posting seeking a candidate to fill the position of Junior Web Developer. Based on the stated qualifications, I believe I am a good fit for the position.

I have a diversified background in web development, organizational administration, interpersonal team building, and community service which I think will be an asset to your organization. When it comes to frontend development, I am capable in the following technologies:

- Javascript & JQuery
- Ajax
- HTML 5 & CSS 3
- Design frameworks such as Bootstrap and other popular frameworks

In addition to my experience with foundational frontend tech, I have designed and built full stack applications which include technologies such as Node.js, APIs, Express, and database management through MySQL and MongoDB. These applications may be perused at my portfolio page: www.richardsoh.com.

Furthermore, as a student of higher-education for over a decade, I am a life-long learner who is always willing to expand my knowledge base in order to adapt to the growing needs of a developer position.

When you have the opportunity, please review my resume included in this file. I feel that I am qualified for this position and will be a lasting benefit to your organization.

Sincerely,

Richard Oh
